Bloomington, IN • (930) 904-4910 • [Portfolio](#) • [LinkedIn](#) • [Email](#)

Product Designer with 3+ years of experience designing AI-powered enterprise and consumer fintech products, including two-sided marketplace pricing and payment flows. I've designed from zero as one of the first designers at a B2B SaaS startup and for Rocket Mortgage's AI assistant. I specialise in simplifying complex, high-stakes workflows through agent configuration experience and decision-support interfaces.

EXPERIENCE

Product Designer @ Heartland Community Network Bloomington, IN • Jun 2026 – Present

- Reconstructed pricing requirements by auditing product specs, API documentation and legacy designs, uncovering unsupported features and missing backend-driven pricing logic.
- Translated these findings into IA and payment flows for advertiser and broadcaster transactions, covering CPM pricing, negotiation, payments and payouts.

Conversational AI Design Intern @ Rocket Mortgage Detroit, MI • May 2025 – Aug 2025

- Designed adaptive AI guidance for Rocket Assist, personalizing post-offer experiences across **6.8M+ client conversations** through loan-stage and home-specific context.
- Defined three interaction patterns to extend the redesigned experience, advancing them to roadmap discussions with the product lead for the next development cycle.
- Led usability testing with 8 Rocket Mortgage clients against defined success criteria; **92% found the redesigned experience more helpful and trustworthy** than the existing assistant.

Product Designer @ Tars Technologies Bengaluru, India • Mar 2022 – Jul 2024

- Joined as one of the first two designers at Tars**, establishing the design system, component library and design-dev handoff process from scratch, which served as the foundation of subsequent product work.
 - Owned research and interaction design for the Asimov dashboard, enabling **15+ enterprise** teams to configure and manage AI workflows; **achieved 41% product adoption** within the first quarter post-launch.
 - Designed and shipped Chatbot Debug Mode for internal team, surfacing conversation flow errors and system issues in one place, **cutting manual troubleshooting time by 70%** across large-scale deployments.
-

SKILLS

- Interaction Design:** Information Architecture, Payment Flows, Monetization, Design Systems, Responsive Design, Accessibility, Conversational UI, Agentic Interfaces, Agent Configuration Design
 - Tools:** Cursor, Claude Code, Figma
 - Research & Validation:** Usability Testing, Qualitative Research, Interviews, Heuristic Evaluations, Competitive Analysis, A/B Testing
-

EDUCATION

MS Human-Computer Interaction @ Indiana University Bloomington May 2026

Bachelor of Architecture @ Amity University May 2019
