Priyamwada Pandey

Bloomington, IN • Portfolio • LinkedIn • Email

0→1 Product Designer with 3+ years turning complex business and technical requirements into usable B2B SaaS, AI and marketplace products. Strongest while shaping product strategy and partnering closely with founders and engineering teams at startups as an early or sole designer.

Experience

Senior Consultant (Product Design) • HCN

Jun 2026 – Present • Bloomington, IN

- Leading 0→1 product design as the **Adtua team's sole designer**, defining the account model for a two-sided ad marketplace and **establishing its brand and design system.**
- Designed the marketplace's pricing model, translating CPM-based inventory pricing into plans for advertisers and screen owners and reconciling how supply-side inputs determine advertiser costs.
- Redesigned screen-owner onboarding to decouple inventory listing from hardware setup, enabling owners to sell screen time before pairing their devices.
- Designing the advertiser wallet with engineering to **reduce per-booking transaction fees**, mapping how funds are held, released through escrow and refunded across the booking lifecycle.

Conversational AI Design Intern • Rocket Mortgage

May 2025 – Aug 2025 • Detroit, MI

- Redesigned Rocket Assist **(6.8M+ client conversations)** to personalize answers by loan stage and replace text dumps with sourced cards; **92% of clients found it more helpful, 75% more trustworthy.**
- Designed an in-chat handoff to each client's purchase specialist with context carried over; **96% of clients said it would reduce frustration**, and 3 patterns were prioritized on the roadmap.

Product Designer • Tars Technologies

Sep 2021 – Jul 2024 • Bengaluru, India

- **Led the design of a new product line** with Tars' founders, ran 20 user interviews that shaped its roadmap and shipped 5 releases in 5 months.
- Designed admin-only permissions, a response model for permission clashes and answers that show their sources and steps; **~74% fewer repeat questions between teammates, 86% rated helpful.**
- Built Asimov's design system of **20+ components and 90+ variants**, later formalized into **100+ tokens**; **cut handoff-to-release time by ~60%**, and Tars' main product adopted its core components.
- **Cut chatbot troubleshooting time by ~70%** by designing and shipping Debug Mode, an automated testing feature that surfaces failing nodes across large agent canvases for the CS team.

Product Design Intern • Tars Technologies

Sep 2021 – Feb 2022

- **Gave ~85 active clients their first native chatbot evaluation** and monitoring view by building Tars Analytics end-to-end from scratch across 10 visualization types.

Skills

- **Product Design:** Agentic Interfaces, AI Transparency, Information Architecture, Design Systems, Monetization and Pricing, Payment Flows, Permissions and Access Control, Conversational UI
- **Research & Strategy:** User Research and Usability Testing, Design QA
- **Tools:** Figma, Framer, Cursor and Claude Code for AI-assisted prototyping

Education

MS Human-Computer Interaction @ Indiana University Bloomington — Aug 2024 – May 2026

Bachelor of Architecture @ Amity University — May 2019
