

Priyamwada Pandey

New York, NY • [Portfolio](#) • [LinkedIn](#) • [Email](#)

0→1 Product Designer with 3+ years turning complex business and technical requirements into usable B2B SaaS, AI and marketplace products. Experienced in shaping product strategy and partnering closely with founders, product, and engineering teams at startups as an early or sole designer.

EXPERIENCE

HEARTLAND COMMUNITY NETWORK • **Product Designer**

Jun 2026 – Present • New York, NY

Adtua / *Two-sided ad marketplace*

- Building the core product experience from business, API and pricing requirements, **defining the IA, role-based workflows and design system** for advertisers and broadcasters.
- **Identified and introduced new monetization strategies** for the marketplace, designing premium upsells and pricing experiences to help advertisers and broadcasters understand and purchase paid features.

Chomp / *Food and recipe social app*

- Shaped Chomp's App Store-ready premium experience by reconciling the payments brief with what was built, **surfacing gaps in subscription states and payment flows**.

ROCKET MORTGAGE • **Conversational AI Design Intern**

May 2025 – Aug 2025 • Detroit, MI

- Redesigned Rocket Assist (**6.8M+ client conversations**) to personalize answers by loan stage and replace text dumps with sourced cards; **92% of clients found it more helpful, 75% more trustworthy**.
- Designed an in-chat handoff to each client's purchase specialist with context carried over; **96% of clients said it would reduce frustration**, and 3 patterns were prioritized on the roadmap.

TARS TECHNOLOGIES • **Product Designer**

Sep 2021 – Jul 2024 • Bengaluru, India

Asimov / *0→1 AI agent for Slack*

Founding Designer • Dec 2023 - Apr 2024

- **Led the design of a new product line** with Tars' founders, ran 20 user interviews that shaped its roadmap and shipped 5 releases in 5 months.
- Designed admin-only permissions, a response model for permission clashes and answers that show their sources and steps; **~74% fewer repeat questions between teammates, 86% rated helpful**.
- Built Asimov's design system of **20+ components and 90+ variants**, later formalized into **100+ tokens**; **cut handoff-to-release time by ~60%**, and Tars' main product adopted its core components.

Debug Mode / *Agent testing*

- **Cut chatbot troubleshooting time by ~70%** by designing and shipping Debug Mode, an automated testing feature that surfaces failing nodes across large agent canvases for the CS team.

Tars Analytics / *Chatbot monitoring dashboard*

Product Design Intern • Sep 2021 – Feb 2022

- **Gave ~85 active clients their first native chatbot evaluation** and monitoring view by building Tars Analytics end-to-end from scratch across 10 visualization types.

SKILLS

- **Product Design:** Agentic Interfaces, Conversational UI, Human-in-the-Loop, AI Transparency, Information Architecture, Design Systems, Data Visualization, Payment Flows, Permissions & Access Control
- **Research & Strategy:** User Interviews, Research Synthesis, Usability Testing, Product Strategy, Design QA
- **Tools:** Figma, Framer, Cursor and Claude Code for AI-assisted prototyping

EDUCATION

MS Human-Computer Interaction @ Indiana University Bloomington

Aug 2024 – May 2026

Bachelor of Architecture @ Amity University

May 2019
